

Democracy does not have to end on election day....

For earth day, and people day +++

Corporate Welfare?
Campaign Finance Reform?
Globalism?

Re-engineering the landscape of our democracy for our environments...

Healthcare?
Family Valuing Policies?
Workers Rights?
Labor Respect?
Our Environment?
We Decide?

deep
democracy

**Reclaiming Representative
Government**

Real Reform for a Real Change... *A Real Public Voice For the Majority... If it's not more democratic it's not real reform...*

DEMOCRACY^{DIRECT}: is a modest proposal for affecting real government reform for better and more responsive democratic government--

The US Constitution was Amended to permit popular election of senators.

--by vesting a meaningful and direct public voice (not necessarily the last word) in all non-emergency macro-policy local, state, and national legislation,

No Democracy, No Peace!

--by merely vesting only the legislative ratification powers and duties of only the House of Representatives directly with the people via secured electronic, phone, computer, mail and absentee ballot, after HOR debate and Bill-packaging, and after public debate and agendizing and calendaring House proposed Bills for consideration, and yes, ratification directly by the public.

No Democracy, No Justice!

The presidency, the Senate and the courts would remain as currently formed and their functions would continue unchanged for continuity and safeguards against the potential for majoritarian tyranny.

Local and state governments can likewise be made more democratic as well...

Just put it on the ballot... in every state as a advisory vote!

DEMOCRACY^{DIRECT}: Reclaiming Representative Democracy
