

**The classic problems of direct democracy
have been resolved!**

Decent Teachers' Pay?
Corporate Welfare Reform?
Campaign Finance Reform?

Redemocracy

Harvesting the Collective Wisdom of We The People.
Government Officials Under the Influence (GUI) of Big Soft Money Gave Us
the Energy Crisis in California... Had Californians Taken For Themselves a
Meaningful Voice in Their Self-governance we'd have market rather than
monopoly priced energy . Public Government, Anyone?

Humane Justice?
Globalism?
Healthcare?
Real Family Valuing Policies?
Community Sustaining Policies?
Workers Rights?
Labor Respect?
Affirmative Action?
Public Utility Reregulation?
WE DECIDE?

Reclaiming Representative Government

Redemocracy: Is a modest proposal for affecting
real government reform for better and more responsive,
more democratic government--

"We The People" once Amended the US Constitution to permit popular election of US senators.

● --by vesting a meaningful and direct public voice
(not necessarily the last word) in all non-emergency
macro-policy state and national legislation,

Sow Democracy, Harvest Peace!

● --by merely vesting **only** the legislative ratification
powers and duties of **only** the House of Representatives
directly with the people via secured electronic, phone,
computer, mail and absentee ballot, after HOR debate
and bill-packaging, and after public debate, agendaing
and calendaring House proposed bills for consideration,--
for ratification directly by the public.

One thing more important than how big government is, is how democratic--how representative it is...

● The Presidency, the Senate and the Courts would
remain as currently unreformed and their functions would
continue unchanged for continuity and safeguards
against the potential for majoritarian over-reach.

Local and state governments can likewise be made more democratic as well...

Just put it on the ballot... in every state as an advisory, trial basis,
or for-real vote! For national, state, **local**, and global government....
